Trismegistos Partner Projects

 Several partner projects collect information for Trismegistos in one shared Filemaker database system. In the Trismegistos portal, only basic information is given, but a link to the website of the specific project is provided for more elaborate information (red buttons). Alternatively, you can use a particular project's website to search for information in a specific subset of the database only, such as Aramaic (ATE) or literary (LDAB) texts.

External Partners

 We also work together with other international partners who have their own separate databases, such as the Heidelberger Gesamtverzeichnis (Germany), the Brussels Coptic Database (Belgium) or the Arabic Papyrology Database (Switzerland). Using the Trismegistos Number as a unique identifier for texts, we redirect users to these databases in our search results (grey buttons); some of these projects provide us with regular updates so that we can offer accurate information (blue buttons).
