Introduction to Southeast Asia

Landeskunde Südostasiens

Southeast Asia, a region that extends from eastern India to China, is characterized by a large variety of landscapes and people living according to different beliefs and cultures. The course forms an introduction to this diversity. It presents, in the first place, the main geographical features of the region, the spoken languages, and a broad chronology, which punctuates the region's history with a particular focus on the formation of major Southeast Asian cultural centers.
